Subject: Summer STEM opportunities for Hawaii High School students

Aloha Michael,  
In regards to the Summer STEM opportunities email that has been disseminated to the AAPT list, would it be possible to also add another program that was recently opened: <http://www.ifa.hawaii.edu/UHNAI/HISTAR.html>

HI STAR is a one week astronomy program at the University of Hawaii Manoa campus in Honolulu. This program is designed for grade 8 - 11 students who would like to work on science research projects. This year's camp is June 3-10, 2017. Applications are now open.

Mahalo,  
Carolyn Kaichi
