Hi, Please announce to your students.
Students may be able to get a sponsor to pay airfare, etc.
Cheers,
Mary

Aloha educators who work with high school students -

Often I am asked about STEM opportunities for Hawaii high school students, so I am attaching info on 3 summer programs on the mainland. One pays the student to participate, one charges the student to participate, and one is neutral (it covers your expenses while you're on the mainland, but you still have to pay airfare). Mahalo Cherryle for compiling these opportunities!

Please do not reply. I have no information other than what is provided on the attached, so I will not be able to respond to any requests for more information.

Mahalo
